Vials with firmly integrated inserts

Vials with firmly integrated micro-inserts have the advantage of a ready-to-use unit that can be filled easily and safely due to the firm fixation of the insert. Afterwards the vial can directly be placed on the lab bench or in a tray / rack. Sample removal is carried out without any risk for the needle due to the reliable centering of the micro-insert. The risk of any contamination is always lower with ready-to-use sample containers in comparison to individual components that still need to be assembled in the lab. Some of the vials are available with writing patch.

1. Glass in glass products

With these products a glass insert is fused into a glass vial. Some versions have a writing patch and the high transparency of the glass allows a good view on the filling level. However, these products are sensitive to glass breakage during transportation in the area where the two components are melted together.

REF	Nominal filling volume	Ø x height in mm	Description	Regular price in EUR/pk.	Special price in EUR/pk.
702007	0.2 mL	11.6 x 32 mm	Screw neck vial N 9, clear, with firmly integrated insert, conical	52,00	38,40
702007.0	0.2 mL	11.6 x 32 mm	Screw neck vial N 9, clear, with label, with firmly integrated insert, conical	58,00	44,20
702008	0.2 mL	11.6 x 32 mm	Screw neck vial N 9, amber, with firmly integrated insert, conical	53,00	40,60
702891	0.2 mL	11.6 x 32 mm	Crimp neck vial N 11, clear, with firmly integrated insert, conical	51,00	38,40
702891.0	0.2 mL	11.6 x 32 mm	Crimp neck vial N 11, clear, with label, with firmly integrated insert, conical	56,00	44,20
702014	0.2 mL	11.6 x 32 mm	Crimp neck vial N 11, amber, with firmly integrated insert, conical	52,00	40,60
702709	0.2 mL	11.6 x 32 mm	Snap ring vial N 11, clear, with firmly integrated insert, conical	52,00	38,40
702708	0.2 mL	11.6 x 32 mm	Snap ring vial N 11, amber, with firmly integrated insert, conical	53,00	40,60

2. Glass in plastic (polypropylene) products

A more robust and cost-effective alternative to the before-mentioned glass in glass micro-vials, however, with slight disadvantages regarding transparency. The glass insert is absolutely centered in an inner cone of the plastic outer shell. The products may also be supplied with an integrated silanized insert.

REF	Nominal filling volume	Ø x height in mm	Description	Regular price in EUR/pk.	Special price in EUR/pk.
702135	0.2 mL	11.6 x 32 mm	PP Screw neck vial N 9, transp., with firmly integrated 0.2 mL glass insert, conical	40,00	29,00
702335	0.2 mL	11.6 x 32 mm	PP Screw neck vial N 9, amber, with firmly integrated 0.2 mL glass insert, conical	40,00	31,10
702134	0.2 mL	11.6 x 32 mm	Crimp neck / snap ring PP vial N 11, transp., with firmly integrated 0.2 mL glass insert, conical	38,00	29,00
702334	0.2 mL	11.6 x 32 mm	Crimp neck / snap ring PP vial N 11, amber, with firmly integrated 0.2 mL glass insert, conical	40,00	31,10

For appropriate micro-vials, please see pages 21, 27 and 30 in our catalog „Vials and caps“ or use the following qr-codes:
